About the Author

About the Author

Dr. Steiner works as a Pediatric Anesthesiologist in Texas. Before starting medical school, he worked as a full-time paramedic (EMT-P) after completing college and held the Emergency Medical Technician–Tactical (EMT-T) certification for medical support of Special Weapons and Tactics (SWAT) teams.

During his residency training in anesthesiology, he edited The Acute Pain Manual, which was a survival guide for residents while on the acute pain service and developed Vapor Camp, a one month introduction for anesthesiology interns to prepare them for the operating room. Dr. Steiner was chief resident his senior year.

For the last eight years, he has been a member of Outcomes Research Consortium, which is an international research group based out of the Cleveland Clinic. Dr. Steiner’s research interests include pediatric airway management, respiratory monitoring, and residents’ medical school debt management.

Dr. Steiner is author of the book The Physician’s Guide to Personal Finance: The review book for the class you never had in medical school.

Dr. Steiner is currently double boarded in anesthesiology and pediatric anesthesiology and continues to teach anesthesiologists assistant students, residents, fellows, and airway rotators in the art and science of pediatric anesthesiology.

Great starter book

By Ryan A Sexton

Concise and readable, this is an excellent resource for someone who is just beginning their adventure in anesthesia and doesn't want to feel completely lost in the operating room. Intentionally not as in depth as the more definitive anesthesia texts, this book is a nice overview to lay a groundwork and then you can delve deeper into the bigger texts once you have your feet under you. Dr. Steiner was previously a paramedic, so this book is written in a very practical "what do I need to know now and why" point of view that does a good job covering most of the basics without putting you to sleep (pun intended)1 of 1 people found the following review helpful.

An excellent resource for ALL rotating on anesthesia

By Cyrus

Every single person rotating on anesthesia should read this book before they begin - whether you're a medical student, anesthesia assistant, SRNA, rotating resident or even a budding anesthesia resident. It is a quick, easy read that can be done in 1-2 days. My program director bought us this book as we do a 5-month rotation on anesthesia -- all I can say is that I wish I had it on day 1. It reviews some of the basic physiology and pharmacology involved in anesthesia, but more importantly it covers the various methods and materials that you will see in clinical anesthesia. Starting an anesthesia rotation is unlike any other type of rotation - there is much to learn and it comes at you fast. This book will prepare you for your first week so that you are not entirely clueless and can progress with your anesthesia education much faster.

This book can make you look like an anesthesia superstar from day 1!1 of 1 people found the following review helpful.

Fills the gap for anesthesia-bound med students.

By E. Winters

Excellent introductory text in anesthesiology. I highly recommend reading this book if you're a 3rd or 4th year med student interested in doing anesthesia and it's a must read if you're about to do an audition rotation at an anesthesia residency program. You'll look like an all star if you take the 90 minutes to read this book! Baby Miller is also a must-have but it's way too dense to get through quickly and it isn't very useful without any clinical experience. Dr. Steiner's book does an excellent job filling the gap between step 2 level knowledge and residency-required baby Miller. See all 10 customer reviews...
