BELA BARTOK: AN ANALYSIS OF HIS MUSIC BY ERNO LENDVAI PDF

'The publication of this study of the music of Bela Bartok is an important event. Many descriptive analyses of particular works of his have appeared, but here for the first time is an authoritative and convincing exposition of the theoretical principles which the composer worked out for himself but refrained, as far as is known, from expounding it to anyone during his lifetime. Erno Lendvai has disclosed the fact that Bela Bartok, in his early thirties, evolved for himself a method of integrating all the elements of music; the scales, the chordal structure with the melodic motifs appropriate to them, together with the proportions of length as between movements in a whole work, main divisions within a movement such as exposition, development and recapitulation and even balancing phrases within sections of movements, according to one single basic principle.' Fundamentals of post-romantic music

By B. P. DANIEL

I have been a lifelong student of composition, and this book opened up a whole new realm of musical thought for me. There are brilliant observations regarding chromatic tonality, atonality, and structure that (although they are presented largely in the context of an analysis of Bartok's music) shed light on the development and future of modern music in general.

The book serves also as a fitting tribute to Bartok, a genius who all too often is written off as merely the modern adaptor of Hungarian folk-song. In this book the author demonstrates how the folk-song interest, and other fundamental Bartok building blocks, have a deep basis in the fundamentals of life and the world.

If you've known Bartok's music speaks to you in ways you can't explain or understand, or if you just want to wrap your head around one of the most important contributions to the development of music in the modern era, then this book is for you.

I hope this review is more helpful than the one below, which seems to be more of a jumble of random thoughts, most of which appear to be associated with some other, more biographical work.
