"Essentials of Contract Law" presents the study of the law of contracts in an organized fashion via a "road map" for thinking about contracts problems. Through the road map concept, students learn about contract formation, determining the applicable law, unenforceable contracts and breach of contract. The text cuts through excess verbiage and outdated doctrine, ensuring that students gain a solid understanding of the material. The rules of law are developed through presentation of theory, followed by an example and a paralegal exercise. Each chapter develops the next step in the road map so the text is methodical and cohesive. Students are also taught how to analyze a contract problem using a common law and code.

Good for paralegals too

By A Customer

This book is considered a text, but I've given it to my paralegal staff to use as a brush-up/refresher course in contract law. It's well written and covers the essentials of the area in a solid progression of topics.

Well organized, but needs more examples

By L. A. Stephenson

I am in a love/hate relationship with this book! On the up side, it is very well organized. In fact, it reads like a really, really good set of notes. On the down side, although it is well organized, it ONLY reads like a really, really good set of notes.

I am presently using this book in an online paralegal course and find myself going online constantly to hunt for examples or explanations of the definitions. It would really help for the authors to provide more examples and maybe even answers to selected questions.

On the other hand, if you are trying to plow through a wordy text and need a good, organized synopsis of the material, this is the book for you.
