Informative Book. No pages falling out issues.

By Sunny Skies

This book is a required textbook for my interior design program. The chapters cover topics like paint/wallcoverings, carpet/rugs, window treatments, flooring, wood and more. Each chapter discusses "Key Terms", describes the material, how it is produced and characteristics. This book deals with specifying the materials so there is some discussion of costs, inspection, managing budgets and selection criteria. Each chapter has a specification sample form. Overall, I liked this book and there was a lot of detail. I especially

liked the blue boxes that contained helpful tips and hints and "cautionary tales." As a first year student, we did not get into all the chapters, but I felt the ones we covered were in-depth and predominantly well-written. There are a lot of color photographs, which are always welcome. Overall I give this book 4.5 stars.

I agree with another reviewer, the content is great! Very informative and I like the format she uses. She also uses good examples from her own personal experience of what works and doesn't work. My problem is the book has fallen apart!!! I took my course online, so the book never even left my house! I know through talking with classmates that this is a problem with this book. I was told this has happened to students every semester. So for content, I'd give it 5 stars, but if you plan on hanging on to this book for future reference, it won't last

poorly made...

By Derek K.

Seriously a joke... the pages started falling apart since day 1!! I've never seen something like that!

The contents are great, I can't say the same thing about the material of which is made of.
