Great book on painting water in watercolor

By Dom Nguyen

This is a very good book on painting water. There are all types of water in any form: fog, rain, river, ocean to snow and ice. The best part is painting turbulent waters which in my opinion are most difficult to recreate in watercolor. I especially love the treatment on water color and value. This book (and some others) make me realize the importance of value studies/sketches that you do before actually starting to work on a painting.

There are also tips on watercolor painting in general and some useful color combinations to paint water. The author also created several bonus videos that show him in action.

Great book. I'm glad I bought it.
