Life as a post-apocalyptic rancher isn't easy for Bishop and his family. The Texan's struggles are further complicated by a recovery that has left him feeling out-of-touch with the new realities of a rapidly changing society. Out of the West comes the most serious challenge the Alliance has ever faced, a danger so potent that it could lead to another downfall and spell the end of the grand experiment in self-reliance. Respecting Bishop and Terri's wishes to live a normal, secluded life, the Alliance leadership does its best to overcome the new threat. Despite heroic acts and the best intentions, their efforts only succeed in pulling society closer to the brink of another collapse. With their friends in danger, war looming on the horizon, and the Alliance's future teetering on the brink, the couple is thrust into a fast-paced adventure that tests the limits of their skills, intellect, and love for each other.

Great read!

By Avid Cook

Having read all of the Holding Their Own books to date, I was excited to see that a new one was added to the collection. While the Salt Wars was a bit stale, this one had more of the excitement inherent to the previous publications. While those picking this up as their first read might feel a bit lost, it's always been a pet-peeve of mine to have half of a sequel spent recapping the previous works to keep the reader up to speed. Thankfully, Joe Nobody apparently share my attitude, and I appreciate being able to jump right back into Bishop and Terri's world right where we left off. It was a very enjoyable read, and I highly recommend it!

Time to root for the Indians?

By Walter C. Lee

Joe Nobody's body of work needs to be taken as a whole. The books, in general, stand on their own, and at least in terms of the "Holding Their Own" series are tied together by the adventures of Bishop and Terri. But taken as a collection, they are an exploration (grantedly an exploration from a single person's vantage point, of theories of governments and what happens when they collide. The Toymaker raises the issue of rights to

resources. Certainly the Native American theme adds to it, but I am not a fitting judge to speak on the authenticity of their perceptions. Still (spoiler alert), the key issue is who has a right to divert rivers to irrigate crops. To what lengths can a people (morally) go to preserve their respective societies if there is a cost to other people. And what lengths are a people morally entitled to go to get it back. The women in the books are the voices of moderation, reason and compromise. The only problem I have is that I'm too old and fat to do the things that Bishop does on a regular basis.

Book number ten of an eleven book post-apocalyptic series

By Michael Lynn Mcguire

Book number ten of an eleven book post-apocalyptic series. The book format is trade paperback, my favorite, and is POD (print on demand).

It has been a rough two years since the financial and biological warfare fall of the USA. Almost two thirds of the population has died due to starvation and disease. The survivors are barely getting by and the various regions are splitting apart.

The Texas Alliance is slowly rebuilding and even reintroducing the concept of cash money. But getting along with the neighbors is proving to be difficult.
