Another yearly edition - great resource!

By J. R. Tow

Another year - another WRTH. Same layout - same 674 pg, inc covers. The price dropped since I ordered it Wed - and it's only Fri - aggravating. It's now \$36.71 + s/t (Prime). That beats the pre-available order price of \$49.95! A few reviews of SDR & a new Wellbrook loop were interesting. Some of the data, of course, is already out of date - Example: Radio Australia will go off the air next month! Still a valuable resource - I started buying it in the eighth grade - still have that 1963 edition.

Absolutely indispensable!

By John Fud Zavacki

As a fairly recent convert to SWLing and DXing in general, I was lucky enough to discover WRTH last January and pre-ordered my first volume.

The information, reviews, tech evaluations and explanations and the exhaustive broadcaster listings are a weath unmatched anywhere else in the DXing universe.

If you are new to DXing and don't have a copy of the WRTH, you need one. Otherwise you're not reaching your listening potential.

If you're an old hand, well... you've already got yours!

As a SWL I'll be listening to a foreign station on a given frequency and if I want to know from where their broadcasts originate

By Tuebe D. Cyded

A must have if you're a Short Wave Listener (SWL). Everything you want to know about a station in this book: frequency, times in GMT, language. antenna location, etc.

As a SWL I'll be listening to a foreign station on a given frequency and if I want to know from where their broadcasts originate all I have to go is look up the frequency and the rest is hopefully great native music.
